PROFESSIONAL SUMMARY

Marine Corps Veteran and Aviation Management student at Saint Louis University with 5+ years of experience in maintenance, compliance, leadership, and operational readiness for 27 MV-22 aircraft. Background in management, quality assurance, and data analytics, all in high-stress operational environments. Combining my military aviation experience with my formal aviation management education to pursue a higher-level management role within the aviation industry.

CORE COMPETENCIES

- Aviation Operations Management
- Program Development & Management
- Personnel Management
- Quality Assurance
- Compliance Management
- Data Analysis & Performance Reporting
- Inventory Accountability
- Safety Management and Risk Mitigation
- Aviation Safety Management Systems

EDUCATION AND CREDENTIALS

- Bachelor of Science in Aeronautics (Aviation Management) –
  - Saint Louis University August 2023 - May 2027
- Relevant Coursework:
  - Operations and Business Environment of Aviation
  - Air Carrier Operations
  - Safety Management Systems
  - Aviation and Airport Security
  - Human Factors
  - Introduction to Business Statistics
  - Introduction to Management Science
  - Management of Human Resources
  - Project Management.
- Aviation Maintenance Technology part 65 –
  - Embry-Riddle Aeronautical University, October 2020
- Secret Security Clearance - Active since 2017 (expires 2028)

PROFESSIONAL EXPERIENCE

UNITED STATES MARINE CORPS, JUNE 2018 – JUNE 2023

COLLATERAL DUTY INSPECTOR (CDI) - AIRFRAMES AND CORROSION CONTROL MECHANIC

- Supervised and conducted maintenance and inspection of 27 MV-22 aircraft, supporting pilot and aircrew training operations across the Marine Corps Osprey program.
- Oversaw maintenance and inspection activities for 27 MV-22 aircraft valued at over $1.9B in total assets, ensuring operational readiness and compliance with Naval Aviation maintenance standards.
- Led 15 aircraft maintainers in a multi-shift 24-hour aviation maintenance operations environment.
- Conducted quality assurance inspections, maintenance reporting, and supply chain coordination for aviation maintenance activities.
- Analyzed aircraft diagnostic data including vibration, oil analysis, and fault logs to identify trends and support preventative maintenance and operational readiness.

- Directed the emergency recovery of two MV-22 aircraft following damage incurred during flight operations.
- Maintained accountability for $200,000 in tools, assets, and equipment.

PROGRAM MANAGER – CORROSION CONTROL SHOP

- Administered trend analysis, program development, and training instruction for corrosion detection and prevention programs.
- Managed and inspected hydraulic, structural maintenance, and corrosion control tasks of 15 aircraft maintainers, contributing to 100% operational readiness of 27 MV-22 aircraft supporting 5,000 annual flight hours.
- Evaluated personnel performance and produced monthly guidance reports to improve program adherence and qualifications.
- Developed personnel training schedules, program documentation, and compliance reporting for departmental audits.
- Ensured procedural compliance with Naval and Marine Corps Aviation Programs to support safe completion of time-sensitive projects.

AIRFRAMES MECHANIC

- Performed structural and hydraulic maintenance on MV-22 aircraft to support operational readiness.
- Assisted with inspection, maintenance documentation, and repair operations in a high-tempo aviation maintenance environment.
- Demonstrated adaptability and problem-solving during urgent and high-pressure maintenance situations.

HAZARDOUS WASTE TECHNICIAN

- Managed storage, sorting, issuing, and disposal of hazardous materials supporting eight Marine Corps aviation squadrons.
- Ensured compliance with Navy, Marine Corps, and environmental safety regulations.
- Coordinated supplier communication and inventory logistics to support aviation maintenance operations.

UNIVERSITY INVOLVEMENT

- Saint Louis University Flying Billikens 2023 - Collegiate aviation club participating in National Intercollegiate Flying Association (NIFA) competitions and aviation skill development events.
- Saint Louis University Aviation Safety Committee – Review reported aviation safety concerns and provide recommendations to department leadership to improve safety practices.

SPECIALIZED MILITARY TRAINING

- Aircraft Paint and Finish Training — Center for Naval Aviation Technical Training, Norfolk, VA July 2022
- Aircraft Corrosion Control Training — Naval Air Technical Data and Engineering Service Command (NATEC), Jacksonville, May 2022
- V-22 Advanced Composite Repair Course — Jacksonville, NC April 2020
- Aviation Hydraulic Systems Organizational Level Training — Center for Naval Aviation Technical Training, Jacksonville, NC | January 2019
- Aviation Structural Mechanic Organizational Level Apprenticeship — Naval Air Station Pensacola, FL October 2018

TECHNICAL PROFICIENCIES

- Microsoft Office Suite (Excel, Word, Outlook)
- Windows, Mac, and Linux
